- 
- A photograph showing the interior of a steel building. The roof is constructed with white corrugated panels supported by a network of red steel beams and purlins. The walls are also made of white corrugated panels, with red steel studs visible. The floor is a light-colored, possibly concrete or gravel surface. The perspective is from inside the building, looking towards the far end.

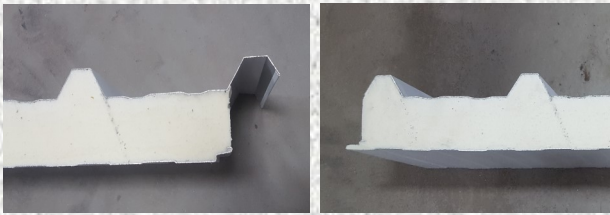

Manufactured by Hardsteel Buildings, Inc.

Advanced insulated metal panel system we have created utilizing our specific steel sheeting profiles and foam

insulation. This sandwich panel system allows for faster and easier construction at the jobsite by cutting your application time in half.

Euro Panels provide you with the advanced quality and performance you deserve!

Exposed Fastener Roof & Wall Panels

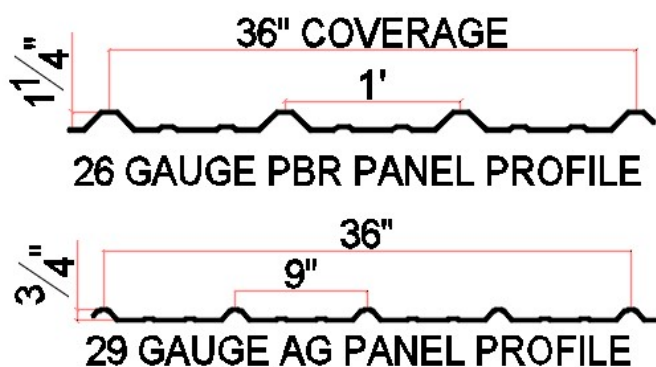

North Plains Panels

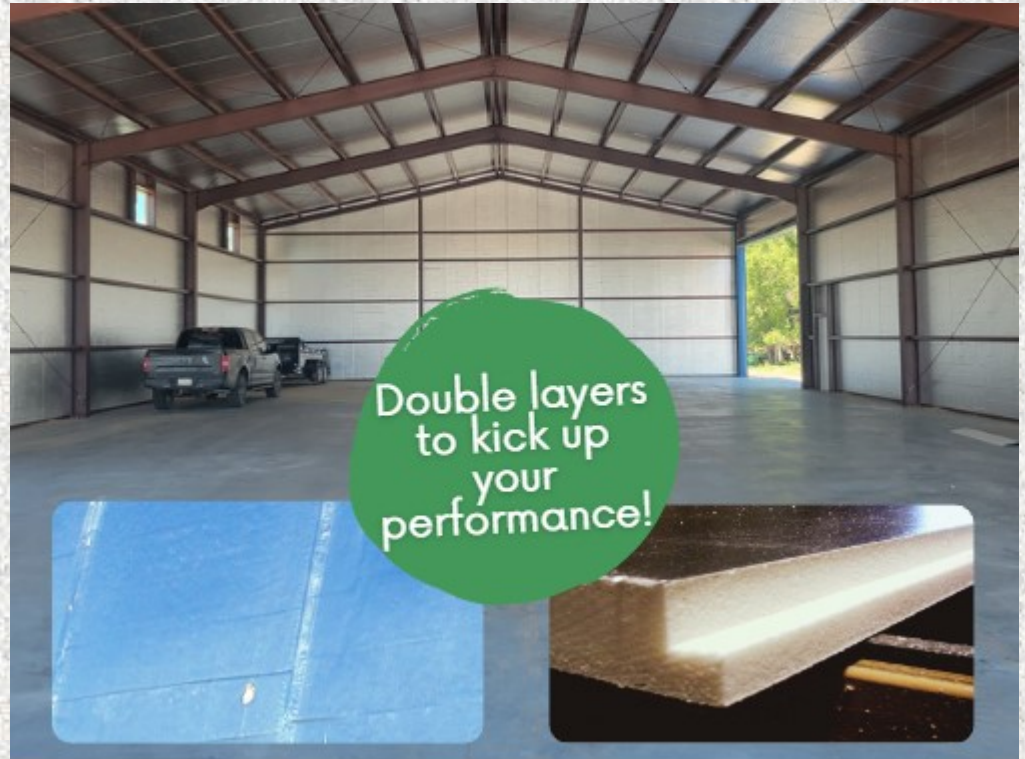

Manufacturer of 26 & 29 Gauge panels and trims.

- 26 Gauge PBR panels are an excellent choice for any project.
- 29 Gauge AG panels are the preferred choice for most residential projects and has similar performance characteristics as the PBR panel.

INSULGREEN INSULATION

- 46" Coverage
- 2" Thickness
- Reflective foil facing on both sides
- Unique ship lap along edges
- Keeps your building warmer in the winter and cooler in the summer
- Aluminum foil tape for seams
- Fasteners with large washers

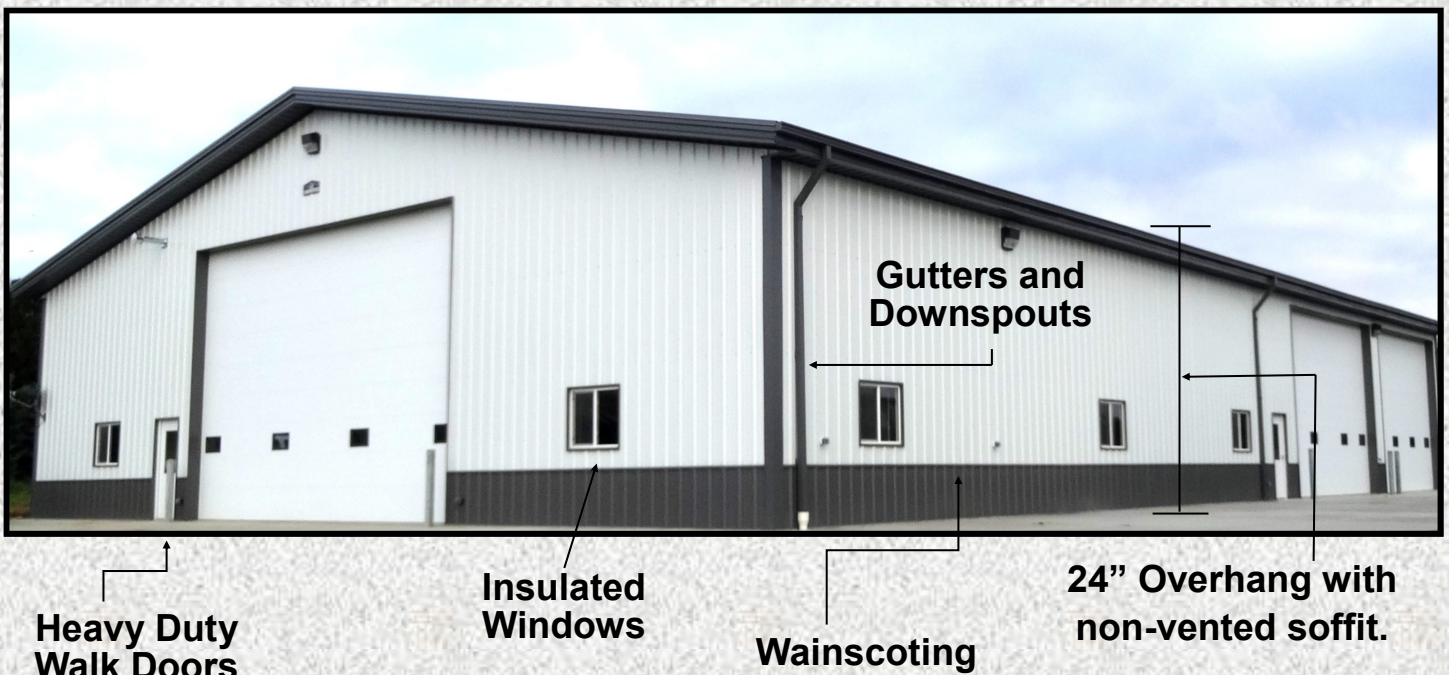

DRIP STOP

Fight condensation without insulation!

- Self adhesive film applied directly to steel panels prior to roll forming
- Exceptional product for non insulated buildings
- Controls condensation by trapping moisture
- Anti-microbial and mold and mildew resistant!
